

## **CLAIMS**

1. An adjustable wrapping device comprising a flexible sheet of a compressible  
2 elastomer having a textured, non-slip surface and a smooth opposing surface,  
3 said smooth opposing surface being laminated to a sheet of a substantially  
4 non-extensible reinforcing fabric to form a laminated sheet; and fastening  
5 means affixed to said laminated sheet, said fastening means being operable for  
6 releasably attaching opposing ends of said laminated sheet to form a cylinder.  
7
  8. The device of claim 1 further comprising a second sheet of a compressible  
9 elastomer having a smooth surface and an opposing surface wherein said  
10 smooth surface on said second sheet is affixed to said sheet of said reinforcing  
11 fabric.
  12. The device of claim 2 wherein said opposing surface of said second sheet of  
13 compressible elastomer is textured.
  14. The device of claim 2 wherein said opposing surface of said second sheet of  
15 compressible elastomer is smooth.
  16. The device of claim 1 further comprising a strip of colored fabric affixed to at  
17 least one peripheral edge of said laminated sheet.
  18. The device of claim 2 further comprising a strip of colored fabric affixed to at  
19 least one peripheral edge of said laminated sheet.
  20. The device of claim 3 further comprising a strip of colored fabric affixed to at  
21 least one peripheral edge of said laminated sheet.

8. The device of claim 4 further comprising a strip of colored fabric affixed to at least one peripheral edge of said laminated sheet.
